FASTQ / FASTQ.gz

Single or paired reads

Python analysis

V(D)J alignment

Partial-read overlap (optional)

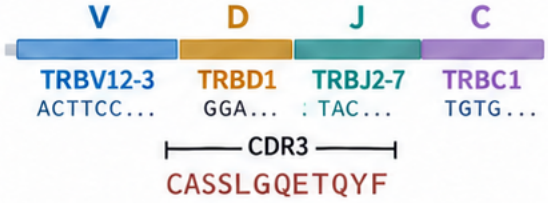

Clonotype assembly

Python + NumPy

Inspectable results

Gene hits + CDR3

Clones + read assignments

Clone	Reads
A	12
B	8

20-read synthetic example

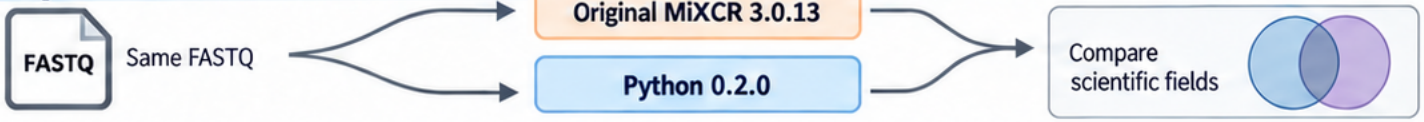

Contigs

Optional reconstruction

TSV | JSON | FASTA

Independent comparison

Gene calls · CDR3 · Counts
Finite tested workflows
